

STOR GUARD

Security Solutions

COMPLETE SELF-STORAGE SECURITY SOLUTIONS

Anti-Vandal backlit PIN and Prox reader

Universal keypad with audio & video

Stor-Guard offers a complete line of security and access control products specifically designed for the self-storage industry. All of our components have been field-tested in the harsh outdoor conditions of the Pacific Northwest and are backed up by the best warranty in the industry.

Stor-Guard founder and President, John Wollam, is a veteran of over 30 years in the self-storage industry and has been involved with thousands of projects. This experience has given us a thorough understanding of the of the problems and challenges facing self-storage owners and managers and has led to many of our most innovative products and features.

Stor-Guard universal Keypad is ruggedized, outdoor, and vandal resistant. It can be configured for PIN, proximity key card, two way audio, color video or all of the above.

Access Controller

Access + Controller is a fully integrated control panel designed to work with our management software. Multiple controllers may be networked to support any size facility.

Billing Integration

Access + allows integration with many popular management software systems. Customers who are in arrears are automatically denied access.

Access + Is the self-storage industry's most advanced access control system. It is equally powerful and easy to operate and include all of the most useful features that experienced property managers have come to expect.

Access + is software based and runs on any MS Windows computer. An almost Unlimited number and type of controllers and peripheral devices can then be connected to the system. The software controls and monitors all alarm and activity events and is fully programmable, allowing for complete flexibility.

Access + also supports individual door alarms which are armed and disarmed by customers PIN at the gate. Door status appears in separate alarm windows.

iOS Mobility App allows control of any site from anywhere in the world. Available through iTunes store, it offers access to reports, gates and security functions

Stor-Guard LLC is a full service integration and manufacturing firm incorporated in Washington State and based in the Seattle area. We specialize in design, manufacturing, installation and service of security and access control systems specifically for the self-storage industry. Our product expertise includes electronic gates and access control, intrusion / perimeter protection and video surveillance systems.

At **Stor-Guard**, customer care is not just a platitude. It is the foundation of our company. Long before developing our own security and access control products, our reputation was built upon providing service and support for PTI, Digitech and other systems. In fact it is our experience with those products and their shortcomings that left to the development of our current Stor-Guard line of security products. Following are some of the components that make up our outstanding customer care.

Technical support Stor-Guard, provides technical support via telephone @ [800-651-3129](tel:800-651-3129) From there, we can usually diagnose programming and configuration problems and/or product malfunction and arrange repair or replacement. You will not be talking to someone in a foreign land but a factory trained application engineer, in the USA.

Professional services: Our professional services group (PSG) specializes in system design and engineering. Whether you are planning out a new facility or upgrading an antiquated system, PSG is at your disposal for design and consulting. We have been involved in thousands of projects and can offer valuable best practice ideas based upon our 20+ years of experience.
