

Stor-Guard Smartlok Solutions

“We’ll lock them out so you don’t have to”

Patented Wireless Security & Over-Locking Systems

BUILT-IN DOOR ALARM

Built-in Alarm Detects Tampering or Cutting the “Smart-Latch” or “Latch-Defender”.

AUTOMATIC OVER-LOCK

Automatic Over-Locking/Un-Locking of Delinquent tenants.

BUILT-IN HEAT DETECTOR

Heat detector notifies the manager if the lock temperature exceeds an adjustable preset limit

BUILT-IN SHOCK SENSOR

Shock Sensor Detects Burglar Attempts if the Lock and/or door is being tampered with.

MULTIPLE USERS PER LOCK

Up to 20 Authorized users per lock, controlled by the main tenant’s status.

IN UNIT MOTION DETECTOR

Smart-Latch Version Only: Detects Burglar Attempts entering into the unit through the wall or roof.

LONG BATTERY LIFE

5-7 year Battery Life under normal conditions.

REGULATORY APPROVALS

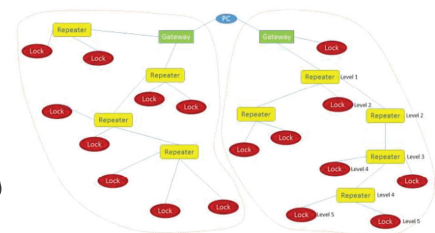

FCC Approved USA and Canada.

PROTECTED UNDER USA PATENTS:

US-7236085, US-7880585, US-8633799

All of the Products Interface with All Major Self Storage Software Management Systems. Locks Store all Transactions, Codes, Unit Status, and Activity in the event of a Power Failure in Non-Volatile Memory.

- Smartlok “Smart-Latch” Series unique design is not only a security system with over-locking functions which prevents un-authorized entry to the unit, but also allows the tenants the added security of using their own Barrel or Standard lock.
- Smartlok “Latch-Defender” is the easiest way to add security to your facility with the added benefits of over-locking delinquent tenant’s access to their unit.
- Smartphone App for the manager that allows complete control of the facility.
- Tenants can monitor the status of their own units, and open the gate with our virtual keypad.
- 99.99% False alarm proof! We disarm the unit at the lock, not the entry keypads!
