

SG-MUX Door Alarm Controller

Features:

- Controls up to 96 devices
- Modular Design - Simply add as many controllers as required
- Arm or disarm using access control keypads
- Rearm using keypad or timer
- Compatible with all Stor-Guard systems
- Uses standard power outlet

Modular

Add as many MUX controllers as required.

Versatile

Available to control 12, 24, 36, 48, 60, 72, 84, or 96 units.

Precise

Monitor each unit, not just a zone.

Automation

Disarm the customers unit at the entry keypad.

Our door alarm controller works the same way as our other controller, but has the ability to arm and disarm each unit when the customer enters their gate code. It works with Stor-Guard AccessPlus software.

The controller communicates with both the keypads and the software. In the event that the controller loses communication with the software, it stores, and will use the stored info, until communication is reestablished.

Specifications:

Electrical Box Size	18.625" x 14.75" x 4.875"
Input Voltage	12VDC
Input Current	110mA
Operating Temp.	-22°F to 150°F
